

I am a full-stack software engineer. I have a knack for building magical web experiences and shipping reliable applications. I am a self-taught programmer and would love to work on great products.

Projects I've built

Nomad Travels

Home-Rental Marketplace

[Live Site](#)

- This is a home-sharing platform for nomads (who like to travel all year long).
- Users can book houses for stays in different cities.
- Users can also host their own house and earn extra income.
- The per/day fixed rate is levied on each listing and will be charged when creating the booking.
- The Home owner will be paid the price as per/day charge.
- All payments are handled and processed with Stripe.

Super Cards

Battle Cards e-commerce store

[Live Site](#)

- The platform sells limited-edition WWE trump cards.
- Customers can add their favourite cards to the cart and then checkout.
- The payment processing is handled by snipcart's JS SDK.

These are just a few of my projects. I build new projects quite often. Please visit my [website](#) or [github](#) to see my latest work.

Technologies and Tools I use

- Languages: Javascript, Typescript, Html, Css
- Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind.css
- Technologies: GraphQL, Docker, Git, Jest, Linux, MongoDB, MySQL

Work Experience

Full Stack Web Developer Development Team

iDigizen India Pvt. Ltd.
Gurgaon, Haryana, India

Oct 2021-present

- Played a significant key role in building iProfile, a unique offering by iDigizen to visualize schools and students data through interactive charts.
- Also worked on internal tooling like Admin Dashboard which is basically a GUI web app for recent purchases, trainer registrations and such data generated from databases.
- Also contributed to the main codebase and also helped the company with these deployments.

Frontend Freelancer

Durgapur, West Bengal, India

Jan 2021-Aug 2021

- Worked on multiple projects while working as a front-end designer for my friend's web design agency.

Interests

- I love to interact with devs on Twitter and also attend online conferences.
- I like reading and to be honest I read a lot especially philosophy books in my free time.
- Also I keep myself updated with the latest and greatest tech through newsletters and blog articles.
- I will soon start writing technical blogs on my [website](#) and also start contributing to open-source projects going forward.
